

# DIABETES AND METABOLISM SEMINAR SERIES

## Islet Biology Workshop

**Thursday, December 10, 2020**

9:00am – 12:00pm

Registration: <https://redcap.link/4lcvy6ne>

- 9:00-9:05 am **Rebecca Hull, Ph.D.**, Director, Diabetes and the Islet Program, UW Medicine Diabetes Institute  
*Welcome and Introduction*
- 9:05-9:50 am **State-of-the-Art Lecture**  
**Mark Huisig, Ph.D.**, Associate Professor, Department of Physiology & Membrane Biology, UC Davis  
*Observing Islet Cell Behavior at Single Cell Resolution*  
  
*Discussion Time*
- 10:00-10:20 am **Javeed Shah, M.D.**, Assistant Professor, Division of Allergy & Infectious Diseases  
*What Does Tuberculosis Have to Do With Islet Cells? A Journey of an Infectious Diseases Physician Toward Diabetes*  
  
*Discussion Time*
- 10:35-10:45 am Break
- 10:45-11:05 am **Paul Kievit, Ph.D.**, Assistant Professor, Oregon National Primate Research Center  
*Maternal Influences on Pancreas Development in Nonhuman Primates*  
  
*Discussion Time*
- 11:15-11:35 am **Pandora “Luke” Wander, M.D.**, Assistant Professor, Division of General Internal Medicine  
*Circulating miRNAs as Mediators or Markers of Beta-Cell Treatment Response in Youth*  
  
*Discussion Time*
- 12:00 pm **Rebecca Hull, Ph.D.**, Closing Remarks
