

Diabetes and Metabolism Seminar Series

University of Washington

The Biology & Clinical Applications of GLP-1 and the Incretin Family

October 26th, 2023 1:15pm - 4:15pm, Brotman Auditorium

Half-day Symposium Register at: diabetesmetabseminars.com

1:15p Coffee & Socializing

1:30p **Megan Capozzi, PhD** Research Assistant Professor,
UW Dept. of Medicine, Div. of Metabolism, Endocrinology & Nutrition
*The Plasticity of Islet Incretin Action Reveals the Importance of
Beta Cell Gs Signaling for Systemic Glucose Metabolism*

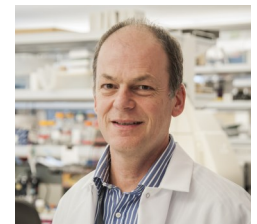

2:00p **Randy Seeley, PhD** Professor, Dept. of Surgery
University of Michigan
*Why isn't the body weight set point set? Implications for the treatment
of obesity.*

2:45p Break & Refreshments

3:00p **Christian Roth, MD**
Professor, Dept. of Pediatrics, UW & Seattle Children's Hospital
Development of Anorexigenic and Glucoregulatory Chimeric Peptides

3:30p **Vanita Aroda, MD**
Associate Professor, Dept. of Medicine; Harvard University;
Brigham and Women's Hospital
Evolution of GLP-1 Based Therapy: Through the Lens of Clinical Trials

4:15p Wrap-up & Refreshments
